Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3, 5, 13 and 44-55, drawn to a method for crossing two plants comprising genomic DNA comprising a desired polynucleotide and further comprising a selectable marker gene, and methods for identifying loss of selectable markers, classified in class 800, subclass 260, for example.
- II. Claims 56-57, drawn to a method for identifying plant-derived transfer DNA, classified in class 435, subclass 6, for example.

The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different effects.

The method of Group I involves methods of crossing plants, selectable marker genes, the absence of T-DNA, assays for the loss of selectable markers, and non-Agrobacterium-mediated methods of plant transformation (see claims 3 and 5), each not required by Group II. The method of Group II involves DNA hybridization assays for the presence of homologous polynucleotides, the permissibility of T-DNA, and Agrobacterium-mediated plant transformation methods, each not required by Group I. Furthermore, the transfer DNA used in the method of Group I can be made by a method different from the genomic probing of Group II, such as chemical synthesis or mutagenesis of T-DNA.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, classification, and fields of search, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David T. Fox whose telephone number is 571-272-0795. The examiner can normally be reached on Monday through Friday from 10:30AM to 7:00PM.
